Product Datasheet

Clean Room Waste Container

Stainless steel waste container for disposing of used radioactive sources and/or needles.

The top is removable for exchanging of the disposable sharps insert.

The lid can be operated with the back of the hand to avoid possible contamination. The waste container is shielded with lead which is encapsulated in a seamless stainless steel body, this allows for effective cleaning making it ideal for the clean room environment.

The stainless steel waste container comes in either 3 mm, 6 mm or 10 mm lead shielding.

Key Features

- Lead Shielding Options
